Garima Jain

Data Scientist

Portfolio: garimajain.isdev
github.com/garima-jain11
linkedin.com/in/garimajain

Results-oriented professional with a strong foundation in Python development and hands-on experience in data analytics. Possesses industry exposure through prior development experience and current role in data-driven problem-solving. Seeking to contribute to data science initiatives that emphasize analytical precision and business impact.

SKILLS

Tools and Languages	Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Plotly, Streamlit, Dash, Jupyter Lab, PyTorch, TensorFlow, Git, LaTeX, Markdown, Shell Scripting
Databases & Data Management	MySQL, PostgreSQL, MongoDB
Quantitative & Analytical	Mathematical Optimization, Mathematical Modeling, Statistics, Data Analysis, EDA, Feature Engineering
Cloud & Deployment	AWS EC2, Docker, Basic DevOps Concepts
Communication	English, Hindi

TECHNICAL EXPERIENCE

Decision Scientist **Jul 2025 — Present**
Mu Sigma *Bangalore, arnataka*

- Developed predictive models to assess factors contributing to customer churn, identifying key drivers and enabling targeted retention strategies.
- Conducted comprehensive problem decomposition using advanced analytical frameworks to streamline decision-making processes and optimize solution design.
- Designed and implemented growth-oriented models to enhance store footfall metrics, leveraging data-driven insights for strategic business impact.

Data Analytics & Cloud Operations Intern **Sep 2024 — Jun 2025**
ITC-LABS *Panchkula, Haryana*

- Executed end-to-end deployment of LIMS software on AWS servers, followed by migration to on-premise networks, ensuring seamless system performance and minimal downtime.
- Developed and maintained automated deployment scripts using Shell (.sh) to streamline server provisioning and application rollouts.
- Implemented monitoring solutions for server logs, identifying anomalies and optimizing system reliability.
- Designed and executed NoSQL aggregation scripts to generate MIS reports, enabling actionable insights for laboratory operations.
- Collaborated on DevOps processes, integrating continuous deployment pipelines and improving operational efficiency.

EDUCATION

Bachelor of Engineering Computer Science & Engineering, Chandigarh University - 8.03 CGPA Aug 2021-Jun 2025
Intermediate (CBSE), Sanskriti KMV School, Jalandhar 2020 — 2021

PROJECTS

Telecom Customer Churn Analysis & Prediction **Mar 2024 — Apr 2025**

Personal Project

- Performed exploratory data analysis (EDA) on telecom customer data to uncover churn patterns, service usage trends, and demographic impacts.
- Built predictive models (Logistic Regression, Random Forest, XGBoost) to identify high-risk churn customers with improved accuracy.
- Developed interactive dashboards using Streamlit to visualize churn risk and customer insights.

COVID-19 Interactive Dashboard **May 2025 — Jun 2025**

Personal Project

- Built an interactive dashboard to monitor COVID-19 trends, including confirmed cases, recoveries, and deaths across regions.
- Implemented dynamic charts and filters to enable real-time data exploration and actionable insights.
- Applied data cleaning, aggregation, and visualization techniques to deliver an end-to-end data science solution.

ACTIVITIES

- "The Wonder Woman" Top 50 Female Coders | Hackon with Amazon S4 Jun-2024
- Secured All India Rank 74 in NCAT | Naukri Campus Apr-2024
- First Position in Hackshield CU Hackathon KAVACH 2023 Aug/2023
- Google Cloud Facilitator Program - Milestone Achieved Mar-2022 — May/2022
